

TGB SWATCH **PRO**™

TGB SWATCHPRO™ INSTRUCTIONS

01

Take out the strip of nail tips and paint with your preferred colours. Gels, acrylics, nail art inspiration - the options are endless! Plus you can cure all nail tips in one go whilst they're attached to the strip to save time.

02

Open the TGB SwatchPro™ book and remove the nail swatch line by gently pulling the oval surface on the right hand side.

03

Remove each individual tip that you've previously painted and add a small dot of TGB glue to the narrowest end of the nail tip.

04

Fit your nail tip into the empty swatch space and press gently until the glue has adhered and dried completely.

05

Add the correlating colour name sticker to the back of the nail swatch line so you can easily refer to what colour your customer has chosen.

06

Click your nail swatch line back into place. Repeat steps until your colour bible is full. Don't forget, your customers can simply unclip the nail swatch line to try on colours before they choose!

HOW WILL YOU ORGANISE YOURS?

Perhaps a SwatchPro™ per colour range, by colour name, brand or something else? Remember, you can also update your new swatch solution whenever you like! It's as simple as pulling out your chosen nail tip and following the above steps to replace with your new colour. Use **#SwatchPro** **#TGBSwatchPro** to show us how you arrange yours.

HOW TO CLEAN YOUR TGB SWATCHPRO

To keep your SwatchPro™ in sleek condition, we recommend cleaning with an antibacterial spray such as the TGB Sanitised AF+ Tool & Surface cleaner and cloth. Do not use acetone based cleaners as this will damage the product.
