

foilX INSTRUCTIONS

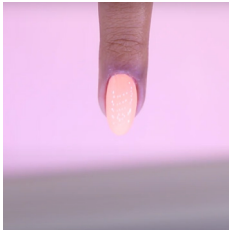

foilX foil gel is the newest TGB 'must have' essential that leaves a perfect tacky layer to apply nail foils. The simplest way to upgrade your mani to the next level this season!

01

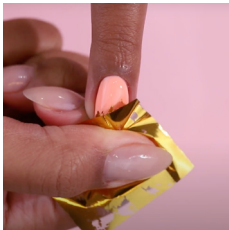

Apply a **thin layer of FoilX** onto the nail where you want the foil to stick. For more intricate designs, **wipe nail with IPA** then use a **TGB liner or detail brush** to apply FoilX.

02

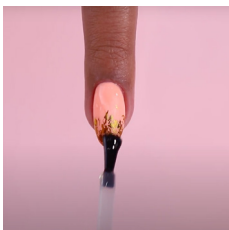

Cure for 60 seconds in an LED light / **2 minutes for a UV lamp** which will leave a tacky finish.

03

Press the foil transfer onto the foil gel (with the design facing upwards). **Gently rub the foil** to transfer the image onto the nail and repeat as necessary.

04

Apply **TGB Extreme Topcoat** to seal the foil in place and cure as per instructions.
